### Concorde Battery Announces FAA-STC for RG-380E/46L Installation on Gulfstream G350 & G450

RG-380E/46L  
24 Volts, 46 Ah

WEST COVINA, CA -- Concorde is pleased to announce FAA certification for installation of Concorde's Platinum Series<sup>®</sup> sealed lead acid batteries, to replace original equipment lead acid batteries, on Gulfstream models G350 & G450. This upgrade to Concorde's RG-380E/46L valve regulated lead acid batteries offer Gulfstream operators access to Concorde's proven Platinum Series<sup>®</sup> battery line that provides reliable performance and that is available through Concorde's worldwide network of Distributors.

STC ST00890DE accommodates the drop-in replacement of two each RG-380E/46L batteries by way of a battery tray that employs the aircraft original mounting support and hardware. Included in the STC kit are all components required for this upgrade.

Concorde Battery Corporation has been manufacturing lead acid batteries for over 40 years at the corporate headquarters in West Covina, CA, and now also in Austell, GA. Under the strict aerospace manufacturing requirements of AS9100

+ ISO 9001 each battery is tested at key points throughout the manufacturing process.

Preferred by over 50 airframe manufacturers as OEM batteries, Concorde also supplies certified batteries to civilian and military markets worldwide. Concorde batteries are available only through our global Distribution network. Log on to [www.concordebattery.com](http://www.concordebattery.com) to find a nearby distributor.
